

In re Appln. of Chamberlain et al.  
Application No. 09/838,987

*REMARKS*

*The Present Invention*

The present invention is directed to a method of inducing an immune response against an antigen in a mammal by inoculating the mammal with two different vectors encoding the antigen.

*The Pending Claims*

Claims 1-8 and 21-23 are currently pending.

*The Amendments to the Claims*

Claim 23 is canceled. In addition, a typographical error wrongly canceling claims 9-21 is corrected to reflect Applicants intention to cancel claims 9-20. Applicants point out that in the prior Amendment claim 21 was indicated both as canceled and amended. This Supplemental Amendment clarifies this issue.

*Conclusion*

The application is considered to be in good and proper form for allowance, and the Examiner is respectfully requested to pass this application to issue. If, in the opinion of the Examiner, a telephone conference would expedite the prosecution of the subject application, the Examiner is invited to call the undersigned attorney.

Respectfully submitted,
